

Health declaration for visiting clinical teaching staff

He/she will be carrying out activities in a clinical setting as a visiting clinical teacher at the Faculty of Medicine, Lund University, Sweden. Visiting clinical teachers who will be in contact with patients must complete a health declaration proving immunity to Measles and Hepatitis B, and negative test result for Tuberculosis and Methicillin Resistant Staphylococcus Aureus (MRSA). Please attach dated proof to the declaration, i.e. lab results or the equivalent.

Tuberculosis Status

PPD test <10 mm or a negative Quantiferon test (Quantiferon test recommended for those who previously have had a BCG vaccination). A positive Quantiferon test or a PPD test >10 mm must be followed-up by a chest x-ray.

He/she has no signs of active TB

Measles and Hepatitis B

Laboratory evidence of immunity for Measles and Hepatitis B.

He/she has confirmed immunity to Measles and Hepatitis B

Methicillin Resistant Staphylococcus Aureus (MRSA)

Negative test result from MRSA screening close to arrival at Lund.

He/she has had a MRSA screening (nostrils, throat and perineum) and the results are negative

This document is to be handed over to the receiving host at the Faculty of Medicine.
