LUND UNIVERSITY

FACULTY OF MEDICINE

Certificate of completion of Introduction to PhD studies

As part of the e-learning course Introduction to PhD studies at the Faculty of Medicine, the PhD student writes a reflective text.

In the reflection, the PhD students address 6 questions, revolving around thoughts about the PhD program, mutual expectations, as well as how they wish to use the ISP and portfolio throughout the education. Once they have completed this reflection, you as main supervisor should read and discuss the reflection with your PhD student. The purpose is for the two of you to talk about expectations and how the ISP and portfolio can be used to meet challenges during the PhD education.

By signing this certificate (on the next page), you attest that you, as the main supervisor, have read the reflection and discussed its content with your PhD student. The certificate is then to be submitted to the PhD studies office.

I hereby certify that I have reviewed my PhD student's reflection and discussed its content.

Name of PhD student:

Civic registration number:

Date:

Name of supervisor:

Signature of PhD student
